# *'Cuban Thorn'*

Editor, Register:

I hope that you bothead letter writers and politicians will read these few lines of prose. . . .

We hear from every quarter that we should send our boys to attack the red base on Cuba, but why shed blood when we have the cure for the thorn, and just three of these injections will do away with the infection. . . .

Some politicians will claim that Kennedy goofed when he didn't send in air support, but let me say this the Ike admin never intended to send in any air cover either even if Nixon had been elected, and I sent proof of this to Washington, and yes the proof came from the CIA months before Kennedy was the President. . . .

So anybody who tries to confuse and gain by the sad state of affairs in the Bay of Pigs, must remember that an Irishman won't buy a pig in a poke even if it came from the Bay of Pigs! . . .

The president doesn't intend to have Cuba be the fuse for WW

III, he asks us to keep our heads and our nerve, and if you cannot read between the lines I guess I shall have to read it for you. . . . Cuba is already zeroed in with enough nussiles to make it a sand spit in the ocean, and when the time comes to heal the wound of the thorn, we will also eradicate the weed that the thorn came from, as one can no longer be separated from the other! Ye of little faith must know that God himself does not give us the future, lest we prepare for it and forget our reason for being, so lets quit crying and do what we must because we must, be it victory or destruction we must never lose our reason and freedom under God. . . .

Yours in Freedom
